PROFESSIONAL SUMMARY

Full-stack web developer in final stage of professional training (Web Application Developer — École O'clock, graduation July 2026) with strong experience in regulated industrial environments. Passionate about building modern, scalable web applications with clean code and excellent user experience. I combine technical rigor developed through 4+ years in pharmaceutical and agri-food sectors with current full-stack skills spanning React, Svelte, Node.js, and modern DevOps practices. Bilingual French/English, adaptable, quality-focused, and eager to contribute to meaningful projects in a collaborative environment.

TECHNICAL SKILLS

Frontend:

Svelte 5, SvelteKit, React, Next.js, TypeScript, JavaScript, HTML5, SCSS/CSS

Backend:

Node.js, Express, PostgreSQL, SQL, Sequelize, Prisma, Python

DevOps & Tools:

Docker, Railway, Git/GitHub, CI/CD, VS Code, Linux

Methodologies & Skills:

UX/UI Design, Agile development, Technical documentation, REST APIs, Database design, Systems thinking, Quality assurance, Team training

EDUCATION

Professional Diploma – Web Application Developer (Level 6 / Bachelor's equivalent)

École O'clock • Remote, France • October 2025 – July 2026

- Intensive full-stack training: Svelte 5, React, Next.js, TypeScript, Node.js, Express, PostgreSQL
- Advanced topics: Docker, CI/CD, database design, API development, Agile methodologies
- End-to-end web application design – architecture, UI/UX, database, deployment
- Team projects and independent problem-solving with real-world scenarios

Bachelor's Degree in Chemical Engineering

Claude Bernard University Lyon 1 • Lyon, France • 2012 – 2015

Professional Degree in Process Development & Production

Claude Bernard University Lyon 1 • Lyon, France • 2015 – 2016

PORTFOLIO & PROJECTS

Personal Portfolio

alithiel31.dev – Full-stack projects showcasing Svelte, React, and modern web development practices

GitHub Repository

github.com/Alithiel31 – Personal and academic projects in React, Svelte, Node.js, with Docker and CI/CD integration

PROFESSIONAL EXPERIENCE

The experience below demonstrates core competencies directly applicable to software development: analytical thinking, documentation, technical communication, systems management, and knowledge transfer.

Manufacturing Technician

Delpharm Gaillard (Pharmaceutical CDMO) • Gaillard, France • December 2022 – Present

- Batch management via Electronic Batch Records (EBR) – mastery of digital systems and data integrity
- Production data analysis and quality control – precision, attention to detail, problem-solving
- Automated workshop supervision and troubleshooting – interpretation and optimization of complex technical systems
- GMP/BPF compliance – understanding regulated environments and quality standards

Technical Monitor & Trainer

ENILV (Butter & Dairy Cooperative) • La Roche-sur-Foron, France • May 2019 – December 2022

- Training apprentices and interns – technical education, curriculum design, and pedagogical skill
- Quality and microbiology leadership – documentation, procedure writing, non-compliance resolution
- Team management of ~10 people – coordination, performance feedback, knowledge transfer
- Maintained industrial production standards and continuous improvement practices

Technical Assistant – Data & Reference Systems

OPTIM Industries (Nuclear Sector) • Loyettes, France • September 2016 – April 2019

- Technical data analysis and compliance via SAP and SDIN modules – data validation and systems integration
- Primary trainer for new employees – structured knowledge transfer and system documentation
- Technical liaison with EDF project leads – stakeholder communication and issue resolution

LANGUAGES

French: Native • **English:** Professional (reading, writing, speaking)
